(54) MICRO-PROBE BOARD

(57)Abstract:

PURPOSE: To collectively perform the probing of an electronic part having matrix like electrode arrangement and to improve high frequency characteristics.

CONSTITUTION: An electronic part having electrodes arranged thereto at a fine pitch in a matrix form is brought into contact with a micro-probe board equipped with probe needles 5 each formed by covering a bonding wire 3 being a core with a hard metal 4 to take continuity and a predetermined test signal is applied to the electronic part from the micro-probe board to perform a test.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right]
